OBJECTIVE

MCA student with strong foundations in Java and Frontend development.

Experienced in building responsive web applications using React and APIs.

Seeking an entry-level software role to develop scalable solutions and enhance problem-solving skills.

TECHNICAL SKILLS

- **Languages** : Java , Javascript
 - **Web Technologies** : HTML , CSS
 - **Database Management** : SQL
 - **Backend Development** : Spring Boot
 - **Frontend Development** : React js
 - **Core Concepts** : Object-Oriented Programming
 - **AI Tools** : Chatgpt, Claude
 - **Version Control & OS** : Git, GitHub, Windows
-

EXPERIENCE

React Developer Intern

Azasoft Solutions – (Jan 2026 - Mar 2026)

- Developed responsive React applications using functional components, hooks, and reusable UI components.
- Integrated REST APIs and implemented dynamic frontend features following modern development practices.
- Improved user experience by optimizing responsive layouts and component performance across devices.

Python Developer Intern

ICONIX SOFTWARE SOLUTION – (Apr 2023 – Apr 2023)

- Developed a GUI-based application using Python and the Pygame library.
 - Implemented interactive features using event-driven programming concepts.
 - Performed debugging, testing, and performance improvements during application development.
-

PROJECTS

IdeaForge (May 2026 - Present)

- Developed a full-stack startup idea validation and protection platform using React JS, Spring Boot, WebSocket, and MySQL.
- Designed a custom traction score algorithm based on votes, comments, challenges, and engagement metrics.
- Built JWT-based authentication and role-based access control using Spring Security.
- Developed an idea ownership certificate system providing immutable timestamp-based proof of submission.

Technologies: Java, Spring Boot, React JS, WebSocket, MySQL

CineScope (Jan 2026 - Mar 2026) [live demo](#)

- Built a responsive movie and TV show discovery application using React JS and TMDB API.
- Implemented search functionality and dynamic movie detail pages with real-time API data.
- Designed reusable React components and interactive user-friendly interfaces.
- Applied React hooks and routing for scalable frontend architecture and smooth navigation.

Technologies: React, TMDB API

ACHIEVEMENTS

1. Solved around 200 problems on various competitive programming sites.
 2. IIT spoken Tutorial on java 65.00
-

PARTICIPATIONS

- Secured Top 40 position out of 5500 participants in Hackathon conducted by Livewire with Nasscom
-

AREA OF INTEREST

Full Stack developement

EDUCATION

MASTER OF COMPUTER APPLICATIONS --- 9.05

2024-2026

Karpagam College of Engineering

BACHELOR OF COMPUTER SCIENCE --- 8.05

2021-2024
